PRICE LIST

—OF THE—

Sarcoxie Nurseries

JAMES B. WILD & BROS., Proprietors.
SARCOXIE, MISSOURI.

ISSUED JULY 25, 1894.

OUR NURSERIES

Are located on the line of the St. Louis & San Francisco Railroad—of the Santa Fe system; two passenger trains daily, each way. Purchase ticket on reaching this line for Sarcoxie. It is but ten minutes walk from depot to our grounds.

Advantageously Situated.

Centrally located on St. Louis & San Francisco Railroad between diverging points. Side track adjoining grounds. Shipping and business facilities unsurpassed. Connected by telephone.

Best Cool Storage and Packing House Extant.

Special Mention.

THE PAST YEARS have demonstrated the great necessity of WINTER STORING young nursery stock and plants, and we now have with our **Cool Storage Process** the best method of KEEPING AND WINTERING trees and plants for shipment at any time, likewise extending planting and shipping into the month of May.

**Cool Storage
Winter Shipments**

FOR WINTER AND SPRING ORDERS.—Our Storage Room (see above cut) having a capacity of over 20 car loads, will be supplied with an assortment of leading Fruit Trees, Forest Tree Seedlings, Grape Vines, etc., which will enable us to **Ship** to our Texas, Pacific, or Western and other distant customers as **early** as they may desire.

All orders requiring additional stock stored should be sent **early**, to enable us to add such to regular stock stored. We have many open winter days for additions.

Customers can order at any time between October and May, and shipments can be made without any danger to any point south of the fortieth parallel in winter (except January) from our storage house of such stock as we have in storage.

A List of Stock in Storage Will be sent to Applicants after Dec. 20th of each year.

We clip the following from the editorial correspondence in the *Prairie Farmer* (Orange Judd, Editor), Chicago, June 26, 1886, relative to the reports on exhibits at the 11th annual meeting of the Nurserymen, Seedsmen and Florists, held at Washington, D. C., June 16th to 20th, 1886. "J. B. Wild & Bros., Sarcovie, Mo., exhibited a lot trees and plants kept in Cool Storage up to June 10, having been placed there November last, without moss, sand or soil; and trees being corded up in fine condition, the plan making it possible to extend shipping season much longer than usual."

THE VARIOUS HABITS AND GROWTH OF TREES.

Upon this we feel necessitated to give some information, especially since there is frequently dissatisfaction expressed by purchasers upon receiving their trees, when they are not all of equal size and beauty. The unsightly, crooked and small trees are looked upon as being inferior, and the nurseryman is at once charged with fraudulent motives for having sent out such trees, while at the same time he may have acted for the benefit of the purchaser, and have given him the most costly as well as the most valuable trees—for there might be a large number of handsome, rapid growing varieties collected for cultivation, which would be the most profitable for nurserymen to cultivate. But would they be for the purchaser? From the fact that such can be grown fit for sale in two or three years; and upon clearing off the nursery ground no refuse trees will be found, while among the crooked growers many will have to be left in the digging on account of being too extremely crooked to send out. And there will be still more among the feeble growers, for many of them are not large enough at even four or five years. The loss on these often reaches 25 per cent. left on the grounds to be cleaned up and burned.

The question may be here asked: Why do not nurserymen cultivate only the nice, thrifty growers? Because those planting trees are desirous of getting good fruit, and we must raise those recommended by our leading horticulturists and fruit growers, also such as our own market and palates say are good. These recommend certain varieties, in which the feeble and crooked growers are recommended as well as the handsome, irrespective of the habit and growth of the tree, which gives it popularity, and this creates a demand for the tree, from which the nurseryman is induced to cultivate it; not because he takes delight in sending out inferior trees, as they are generally called, to receive the abuses of the people, but as a candid, reflecting man, conscious of his responsibility to the community at large for the dissemination of good fruit, his utmost endeavor is—first, to cultivate good fruit, and second, as nice trees as those fruits can be made to grow—not only such as will dazzle the eye in size and beauty, but such as have all the good qualities combined, of which the leading characteristics are flavor and productiveness, in short most profitable, which as he well knows, not only benefits his fellowman, but greatly involves his own personal welfare in after time, as it requires more than mere raising of showy trees to preserve or establish a nurseryman's reputation. However the free and rapid growing of a variety (when accompanied with good fruit) is an important consideration in favor of its extensive cultivation.

Modes of Propagation. As the ways of propagation are so easily understood, for a time we omitted mentioning anything about it; but as we are sometimes asked whether this or that method of propagation is best, we will here state that the majority of our apple trees, as in other nurseries, are grafted on best American or French apple seedlings, usually cut up to average three grafts, called piece root grafts. We do not use whole roots except when budding, but do not claim any advantage for it over any other way, and when the majority of leading Horticulturists say that the whole root grafted are the only trees that produce hardy, thrifty, long-lived and fruitful trees, (and the peach that has always been budded, or at least 90 per cent., and it on whole roots; but notwithstanding all this does not appear to live longer or fruit better) then we shall not be slow to propagate that way also—for we certainly know how it's done. So far, the large and experienced orchardist finds our trees meeting his wants, and as yet he has not been convinced that the other mode of propagation is better—nor have we. As to top grafting, or grafting on hardy roots to produce hardy trees, this too we leave to the theorist—and when he has hardened the peach by working on a hardy stock so that peach growing is profitable in Minnesota, and the choice Early Harvest apple is found growing and fruiting in Alaska through the working on some hardy crab or apple stock, then we will fall into line and offer such trees to our patrons, but not until then. So don't ask us if we have such trees to offer you now; if you do we will kindly but emphatically tell you, No!

Advertisement.

Our Nurseries are situated on the western slope of the Ozark mountain range, at an elevation of over 1,350 feet above the sea (about 900 feet above St. Louis) adjoining open prairie lands. These conditions, together with character and soil, will at once convey the superior advantages we hold for growing nursery stock of the best quality and maturing same in advance of the more northern or southern Nurseries.

Having handled some of the products of a number of leading nurseries east, north and south, the past few seasons, we are convinced that we have better matured stock here by October 10th, than many nurseries can justly claim for same time. The conditions confronting us have brought about the necessity of growing a more complete line of stock, and which we now claim to have, thus assuring our patrons goods of as good quality, well matured and as complete in assortment as can be found in any one nursery.

To Our Patrons and Friends.

We sincerely thank all our customers and friends, who have so generously patronized us in this and former years, for your kind favors. We appreciate them we assure you, and shall always strive to make your dealings with us both pleasant and profitable.

We hope to hear from all our old customers and friends during the coming season, and from as many new ones as can make it an object through **Our Prices and Manner of Dealing Directly With them**, to kindly favor us with their orders.

We give our attention wholly to the Nursery Business. No other interests conflicting. Aided with nineteen years' experience in the most improved methods of growing and handling nursery products, customers can rely on receiving the benefit of our large experience. We confidently ask the attention of our patrons to our stock, and trust when possible they will look through it and see what we have. Our grounds are open and free to all visitors.

THE GREATEST CARE being taken not to send out anything that is not true to name, holding ourselves ready to replace or refund, upon proof, equal to the amount of first cost of trees, etc., that prove untrue, but to no greater amount or extent.

REFERENCES—That we are in actual and permanent business. We deem it only fair to place the information regarding the responsibility of the firm with whom you entrust your orders and commands.

REFER TO Messrs. John Harlan, Cashier Bank of Sarcoux; D. A. Smith, P. M.; Gilbert Schooling; Goodner, Sabert & Co., or any business house in Sarcoux.

To Correspondents.

If you have sent us an order with remittance and do not hear from us in a reasonable time, write again. We invariably acknowledge all orders as received, by postal card or letter, and give an ORDER NUMBER for reference, which you will please preserve.

If you have sent an order WITHOUT REMITTANCE you may fail to get an acknowledgement from a non-compliance with the *terms published*. We answer all correspondence relative to anything in our line of business that is not or can not be answered in our published list; but anything about growing or planting, where a reply is wanted, must be so written as to allow us to insert answers.

Receipts.—The receipt of every remittance is promptly acknowledged by us. Each order received is duly numbered, and as the receipts given mention said number, customers preserving their receipts can readily refer to any order sent us by simply giving the number, and we can instantly refer to the original order, which we preserve for a number of years for any future reference. We hope each purchaser will save their receipts, and when making inquiries concerning any order always give its number, for without it requires time and patience to look it up.

Descriptive Catalogue. 60 pages mailed upon receipt of ten cents in postage stamps, and the amount paid for same will be credited on the first order sent us.

What to Order.

While leaving every one to make his own choice, we advise you not to order too many varieties, whether intended for domestic use or marketing. Select sparingly such varieties as have been favorites in the localities from which you came, especially if you are remote from there, but rather select such varieties as are suited to the locality you intend to plant in. In doing this you may have to give up some favorite sort, but it will be an easy matter when you see how unprofitable and out of season your favorites generally become.

We desire also to call your attention to those so-called Fruit Unions—that agree to plant orchards for you, and who claim to know better what you want, and are willing to select for you; your successful neighboring fruit grower is better able to tell you what to plant than any Nurseryman or Fruit grower remote from where you desire to plant.

Execution of Orders.

We endeavor to execute all orders promptly and as nearly as possible in rotation as received, giving each order the most scrupulous care and attention to insure reasonable satisfaction. Spring shipping brings with it an unusual amount of items to be looked after, and notwithstanding we have a largely increased force of men, orders are liable to be delayed some days. Then again the mails are sometimes missent, or delays occur on the road that we are not responsible for. Occasionally errors occur in the transaction of the hundreds and even thousands of details incidental to our business, but we are always ready to rectify them on proper proof, but can not do so unless informed just what the trouble is within the limited time printed on the invoices sent. When the bill and goods are received check it up at once; if correct give proper credit without delay; if not correct, advise us of the fact then and there. See Article 12, Terms and Conditions of Sale.

Adjustments are easy while the details are fresh in mind, but we can not be blamed for looking with suspicion upon complaints made weeks afterwards, or in refusing to consider them.

Secure Your Selection by Sending Orders Early.

If our friends on receiving this catalogue will make a list of trees and plants they want, and send their orders at once, we can then reserve, until proper shipping season, such stock that may be on hand at time order is received. Orders will be booked by complying with terms and conditions of sale.

Packing and Delivering Season.

Which generally commences about October 10, in the fall; for spring, from open ground, about February 10th (often earlier). For California and the south we pack and ship in mild weather from Storage House all winter, and it gives ample time for long shipments. Past experience has demonstrated, the fact that nursery stock arrives in best condition, when long time is required in transit, if shipped when stock is in most dormant condition—being during the months from November to February.

Care of Trees on Arrival.

As soon as you unpack trees, having your trenches previously dug to receive them, set in a slanting position, then fill in and around the roots, treading the soil sufficiently to make it firm, and avoid having bunches set side by side without soil between them. This is a serious drawback attending the growth of trees, as much damage results from having "heeled in" with openings allowing drying or freezing before planting, and the nurseryman is charged with having sent poor stock, when the fault is in mishandling after arrival.

When trees arrive in a shriveled condition after a long delay in shipment, take out all shriveled trees and bury tops and all for about ten days, to restore them. Should trees arrive in a frozen condition, place in the cellar to allow gradual thawing, or bury in soil until thawed out. Do not expose stock to hasten thawing. It is most essential to let frozen stock thaw out gradually in a dark, cool place; therefore avoid exposure to sunlight or heat when transferring to a secure place.

No Agencies.

We are often asked if we employ agents to sell our Trees and Plants. In order to avoid much correspondence we here state that we have not, since we began business employed any agents.

Our efforts are directed toward the growing of Fruit Trees, Forest and Evergreen Trees and plants, which shall be the best that can be produced. Hence, we look to the growing as of first importance and offer our stock to the Wholesale and Retail Trade through our price-list direct, our only authorized agent.

We desire the patronage of all fruit-loving people, of men who know the value of genuine goods. We want the patronage of careful men who will take care of fruit trees and plants when bought. We want to sell to men who sell again and keep themselves familiar with the best varieties and needs of a planter.

If you desire to sell stock there is nothing to prevent you from soliciting orders on your own account and you can sell at prices that will remunerate you according to your zeal and energy.

Should you purchase trees at wholesale to sell again, we have no objection to you saying that your trees (as much as are purchased of us) are from our nurseries, but in no case can other stock be represented as our growing. Our trees and plants are guaranteed true to name to the purchaser only, after which our control ceases; hence our responsibility also.

READ CAREFULLY BEFORE ORDERING

The Terms and Conditions of Sale.

1. **TERMS.**—The prices in this list are under the following conditions, and for *Cash With Order*. Sales however, to known responsible, prompt-paying customers we will book during shipping season, and forward orders, to be paid promptly on receipt of invoice. Parties unknown, or with whom we have had no business transactions, will please send cash, or satisfactory security with their orders. Stock ordered booked in advance of shipping season to be reserved, must be accompanied with remittance of **at least one-third of the agreed price**; balance to be paid when shipping season arrives; orders so booked, we will name list of stock reserved, and such will be held subject to agreement, unavoidable accidents excepted; when such accidents have occurred, notice will be promptly given stating nature of loss or damage. All accounts not paid promptly when due, must draw interest from date of same, at rate of 8 per cent. per annum.

2. **Special Discounts.**—On bills paid in accordance with Article 1, and when our bill as per prices in this list invoices \$500 or more, 20 per cent. discount will be allowed from bill; and when bill amounts to \$400 or more, 18 per cent. discount; on \$300 or more, 16 per cent. discount; on \$200 or more, 14 per cent. discount; on \$100 or more, 12 per cent. discount; on \$80 or more, 10 per cent. discount; on \$60 or more, 8 per cent. discount; on \$40 or more, 6 per cent. discount; on \$20 or more, 4 per cent. discount, and on \$10 or more, 2 per cent. discount.

3. **Telegraph Orders,** to receive prompt attention when from unknown parties, must place sufficient deposit, subject to our order, with Bank or Express Agent, and note some in message.

4. **Goods Sent C. O. D.** when half the amount is sent us, or deposited with Bank or Express Agent. When deposited it must be certified, and certificate sent with order.

5. **Remittance at Our Risk** if made by Postal Money Order on Sarcoux, Mo., Express Money order, or money by Express prepaid, or draft on New York, St. Louis, Chicago or Kansas City. Drafts and money orders should be made payable to **James B. Wild & Bros.**

6. **Any Remittance in Excess** of invoice will be promptly returned, or held subject to order.

7. **Orders and Conditions of Sale.**—Prices herein quoted are for your selection of sorts at respective prices given, but we reserve the right to fill in a smaller or larger size (or age) than ordered should we be out of the size or age of sorts wanted, charging therefor at the respective size or age used in filling that part of the order. Parties ordering should state preference of a larger or smaller grade so we can be governed accordingly. Uniform grades cannot be guaranteed when sorts ordered are to be strictly adhered to. Orders joined with needed specifications not quoted or agreed to in this price list, will not be entertained except by special agreement. When sorts are ordered that we do not offer in this list, we shall exercise our judgement and send as nearly similar sorts as we have at command.

8. **Grades.**—Sizes, height—or Caliper Measurements—are taken from the collar near the root, and are stated for guidance only. Slight variations may sometimes occur. Reasonable customers will understand that it is not calculated to mean a measurement of each plant or tree. If any items in sizes, ages or height requested are sold out, then the most available will be observed as filling the desired place, unless prohibited in the order as given.

9. **Samples.**—When ordered, will be invoiced at list rates; but subject to rebate to equal prices given on order placed through same.

10. **Boxing, Baling and Packing.**—Prices herein do not include same; a moderate charge will be made for such, but *no charge for delivering to railroad depot or express office here*. We charge for boxes packed as follows; 9 by 2½ feet, \$3.50; 8 by 2½ feet, \$3.00; 9 by 2 feet, \$2.50; 8 by 2 feet, \$2.25; 9 feet by 18 inches, \$1.70; 8 feet by 18 inches, \$1.60; 8 feet by 12 inches, 90 cents, and in proportion for larger or smaller boxes. Bales from 10 cents to \$3.00 each. Boxes ordered paper lined or double lined and filled with sawdust will be extra cost.—See page 7 for approximate cost of packing.

11. **Transportation.**—Our responsibility ceases upon the shipment of goods in good order, and transmittal of Bill of Lading to consignee; and payment of Bill in no instance to be subject to arrival or non-arrival of goods at destination, though we will at any and all times use our utmost endeavors to trace up any missing goods.

NOTE:—In order to secure 3rd class freight rates under ruling of "The Western Classification" on Nursery Stock boxed (not baled), shipper must release to value of \$5.00 per cwt., and in order that our patrons may have benefit of the lower freight rates, we will release and guarantee freight charges through for them, unless instructed on order not to do so. Freight charges not guaranteed must be prepaid, or forwarder will not accept goods for shipment.

12. Reclamation.—Claims for deduction from whatsoever cause must be made immediately on receipt of goods. Check off goods when you unpack, and then and there note carefully on a memoranda, itemized as to sort, size labeled, with number of bunches and, number in each bunch received, thereby giving a detailed report of stock as found. Don't state so and so was short, without stating also what you did get. Remember we, too want to know what you base your claims upon, and must have facts, as you may be over on some items, or mistook one sort for another, or you may have intended to order such and such, or more of some but failed to note same on order as sent in. Adjustments are easy while all the details are fresh in mind, but we cannot be blamed for declining claims upon complaints made weeks afterwards.

13. Insurance.—We do not guarantee stock to live, nor will we replace free of cost that which dies or fails to grow, at prices in this list; nor can we, in view of the various incidents that it is subject to, as the success or failure depend largely upon climatic conditions, manner of planting, after care, etc. Having been in the nursery business for over 19 years at Sarcoxie, and our business having increased with wonderful rapidity, now covering over 540 acres in one body devoted to the Nursery proper, is sufficient evidence that we are up with the times and have won the confidence of the patronizing public and number among our patrons the leading nurseries of the U.S., Canada and Mexico.

14. Guarantee of Genuineness.—While we exercise our greatest diligence and care to have all our trees, etc., true to label, and hold ourselves in readiness, on proper proof, to replace all trees, etc., that may prove untrue to label free of charge, or refund the amount paid, it is mutually understood and agreed to, between the purchaser and ourselves, that our guarantee of genuineness shall in no case make us liable for any sum greater than that originally received for said trees, etc., that shall prove untrue.

15. Positively no Deviation from the foregoing terms, unless made by special agreement.

16. The Publication of this list abrogates previous quotations.

Give Plain Directions for Shipping.

Don't forget to write Post-Office address plainly, also freight or express, if different from Postoffice.

Purchasers will confer a favor by stating the manner in which they wish their goods sent—freight or express—also route. When none are designated we forward to the best of our judgement; but in no case do we assume any responsibility after the packages are shipped.

Prompt Shipments.—To meet this want we have adapted our Packing House to every convenience for the rapid and thorough dispatching of orders.

Weight of trees packed can only be given approximate; 1,000 trees packed for shipment, ordinary weight—1 to 2 feet, 150 to 200 lbs.; 2 to 3 feet, 300 to 400 lbs.; 3 to 4 feet, 500 to 650 lbs.; 4 to 5 feet, 900 to 1,200 lbs.; 5 to 7 feet, 1,500 to 2,000 lbs.

A Car Load will Hold, when packed in bulk in box cars from 10 to 12 thousand 5 to 6 foot trees, and from 14 to 16 thousand 4 to 5 foot trees, and from one-fourth to one-half more when boxed.

Coal or flat cars boxed up will hold double the quantity of ordinary cars. Cost of boxing up coal cars is about \$30.00 per car.

To arrive at the approximate cost for boxing or baling we submit the following:

On 5 to 8 foot trees	\$9.00 to \$12.00 per 1000	\$2.50 to \$3.00 per 100	50c to 60c per 10
" 5 to 6 "	7.00 to 9.00 "	1.50 to 2.00 "	30 to 40 "
" 4 to 5 "	5.00 to 7.00 "	.90 to 1.25 "	20 to 25 "
" 3 to 4 "	3.00 to 5.00 "	.50 to .75 "	15 to 20 "
" 2 to 3 "	1.50 to 3.00 "	.25 to .50 "	15 "
" 1 to 2 "	.75 to 1.50 "	.20 to .25 "	10 "
Plants 6 to 12 inches	30 to 50 "	10 "	10 "
Vines & Straw by plt's	30 to 50 "	10 "	10 "

The approximate cost for boxing and baling transplanted Evergreens:

On 5 to 6 foot trees	\$60.00 to \$70.00 per 1000	\$6.00 to \$7.00 per 100	\$1.00 to \$2.00 per 10
" 4 to 5 "	30.00 to 60.00 "	3.00 to 6.00 "	.75 to 1.50 "
" 3 to 4 "	10.00 to 30.00 "	2.00 to 3.00 "	.50 to .75 "
" 2 to 3 "	7.00 to 9.00 "	1.50 to 2.00 "	.30 to .50 "
" 1 to 2 "	3.00 to 5.00 "	.50 to .75 "	.20 to .30 "
" 8 to 12 inch	75 to 1.50 "	.20 to .30 "	10 "
Seedling Evergreens			
6 to 12 inches	50 to 75 "	10 to 15 "	10 "

No package put up for less than 10 cents.

Wilson's Early	25	1 50	
Crystal White	35	2 50	
Lucretia Dewberry best	25	1 50	
Oregon Late Evergreen	80	7 00	60 00

This last variety is very distinct in habit from all other blackberries, having finely cut foliage, a light pinkish bloom, trailing habit. Fruit very sweet, prolific, of good size, and now on our grounds the seventh year, during which time it has shown no rust. It should be given a trial.

1,000,000 Strawberries.

NOTE.—Strawberry plants should be ordered sent by Express; if by mail add 20 cents per 100 for postage. Plants in September, from new beds, at double the regular rates given below. Varieties marked "P" are Pistillate; those marked "B" are Bisexual—perfect flowering.

NOTE.—We use great care to keep the sorts we offer pure and true to name; therefore do not compare our prices with the careless growers that seemingly offer you inducements by low prices.

Per 10 Pr 100 Pr 1000

Beder-Wood, B—Early, large, good firm berry; splendid sort to pollinize Pistillate sorts	15	50	84 00
Bubach No. 5, P—A general favorite with commercial growers	15	50	3 50
Capt. Jack, B—An all-round berry for here and south	14	40	2 75
Chas. Downing, B—An old standard	14	40	3 00
Crawford, B—Large bright red fruit—"a beauty"	15	50	4 00
Crescent, P—A standard; will stay in the field for some time to come	14	40	2 50
Cumberland, B—"Jumbo;" very large conical berry; productive	14	50	3 00
Dayton, B—Early, perfect flower; will be a leader	16	60	4 50
Enhance, B—Hardy bloom; a good market sort	15	50	4 00
Eureka, P—Late, large, "beauty;" ripens with Gandy	15	50	4 00
Gandy, B—Large and handsome; late, good shipper	15	50	3 50
Glendale, B—First quality, medium late	15	50	3 50
Greenville, P—Of late introduction; comes highly recommended; season medium to late; said to excel Bubach	17	70	6 00
Haverland, P—Large, long, light red berry; vigorous	14	40	3 00
Hoffman Early, B—A southern berry	14	40	3 00
James Vick, B—A favorite here, strong bloomer	15	50	3 50
Jessie, B—Large handsome fruit; tender bloom	15	50	4 00
Kentucky, B—A late fine flavored fruit; good	15	50	3 50
Lady Rusk, P—Strong grower; good sized berry; prolific	14	40	2 75
Marshall, B—(new) said to produce the largest fruit	\$2 00		
Michel's Early, B—One of the best early, and will not be laid aside soon by the fruit grower. Rich in Pollen	14	40	2 75
Moore's Early—(New) from Arkansas	17	70	6 00
Parker Earl, B—A wonderful berry, praised over a wide territory	16	60	5 00
Perl, B—A vigorous grower; large, fine firm fruit	20	1 00	
Princess, P—Hardy, robust; fruit said to average up with Bubach; an all purpose berry	20	1 00	
Sharpless, B—Old, well known; has many friends	14	40	3 00
Shackless, B—Vigorous, productive; good sized berry, novel	17	70	6 00
Smeltzer's Early No. 2 (new) Offered for the first time	25	1 00	5 00
The Michigan experimental station recommends it as "The best early variety out of 80 new varieties tested the past season." Mr. Smeltzer says it is as early as Michel, as productive as Crescent, and as good shipper; and desires it introduced at these low prices.			
Timbrell, P—A new very late variety, said to produce large, dark crimson fruit; firm, good shipper; productive	60	5 00	
Van Deman, B—Extra early; fruit said to be of good even size; attractive; prolific	16	60	4 50
Warfield, P—The market berry here	14	40	2 75
Wonder, B—Said to produce two crops in a season	20	2 00	

NOTE.—State if field count and bunch trimmed to eastern style is desired, then 75c. per 1000 less.

Miscellaneous Fruits, Nuts and Garden Esculent Roots.

NOTE.—Prices on this page are for each, 10 and 100 of a sort and grade. When less than 10 of a sort and grade is ordered, one will be charged at the each rate, and each additional of that sort and grade at the 10 rate, until the 10 rate is reached.

EVERGREENS.

Prices on this page and on pages 16 to 20 inclusive, are for each, 10 and 100 of a sort and size. Less quantity than 10 of a sort and size will be charged one at the single rate, and each additional of a sort and grade ordered at the 10 rate until the 10 rate is reached.

NOTE.—All Evergreens offered are of our own growing, from seeds and cuttings. Do not compare our rates with "forest pulled" seedlings, nor with northern nursery grown, so-called; but note that those we offer can be had long before you can get them from the North. Aside from this ours are acclimated to the West and South, which gives them a decided advantage over others for timber plantations, wind-breaks, and ornamental planting.

All here listed are transplanted and root-pruned. For Seedlings see page 24.

Selected specimens 25 per cent. higher; Extra selected specimens 50 per cent. higher than list rate.

ROSES.

NOTE.—The Roses we here offer are grown in open ground, and must not be confounded with pot plants. All offered are strong plants, suitable for general planting, also for conservatories, cemeteries, etc. Size of plants according to class will average from 10 to 20 inches in height. Climbing roses will be cut back to about 15 inches cane.

Fruit Tree Stocks for Grafting.

No. 12

No. 13

No. 1. Apple Scions (cions) 10 to 36 inches in length.

No. 13 represents a bunch of Extra Heavy Apple Seedlings (stocks) $\frac{1}{4}$ inch and up.

No. 12 represents a bunch of No. 1 Apple Seedlings (stocks) 3-16 to 4-16 inch.

No. 2 represents a bunch of No. 2 Apple Seedlings (stocks) 2-16 to 3-16 inch.

NOTE.—Having no **Fruit Tree Seedlings** of our own growing to offer this season, we have therefore made arrangements with large growers and importers, through whom we will be enabled to supply our customers in that line of stock if orders ARE PLACED EARLY.

Get Our Prices at Once, and in your inquiry be sure to state **QUANTITY, SORT and GRADE WANTED.**

We can secure for you Apple, Pear, Plum, Cherry and Quince Stocks in any grade and quantity desired. A large quantity of Apple Seedlings will be placed in Storage early in November.

Sorts Spirea offered.—Reeves, Fortenaysi, Prunefolia, Billardii and Thumbergii.

Sorts Weigela offered.—Rosea, Hendersoni, Desbois, Amabilis and Vinosa.

Above cut represents one section of our Grafting Room as taken from a photo.

Apple Root Grafts.

Season for Grafting from December to March.

ROOT GRAFTS are Cions and Roots grafted and tied or bound together, and are thus ready for planting in permanent nursery rows.

Orders for Root Grafts given without special agreed specifications, will be put up in same manner as those we put up for our own planting. Length of graft, 6 to 7 inches, which includes Root and Cion. Not less than 100 of a variety will be put up in the general assortment of varieties. Smaller or broken lots, as to varieties, or of new and scarcer kinds, will be priced as list will allow.

Grafts Weigh from 15 to 40 pounds per 1000 packed. All orders put up at our risk of damage in storage up to March 1st; after that date same will be at purchaser's risk.

Prices of Various Styles Apple Root Grafts Offered.

Special prices will be given when in want of large quantities, or on special styles.

Fig. 3.

Fig. 3. Graft worked on No. 1, 3-16 up caliper stock, using first and second cut of a seedling with from 4 to 5 inches to a cut and about 5 inch cion. Such grafts are termed by many nurserymen **Whole Root Grafts**. Price per 100 grafts of a sort 50 cents.

Fig. 5.

Fig. 5. Graft worked on first cut No. 1, 3-16 up caliper stocks, using about 5 inch seedlings and 5 inch cion. This style of graft is termed **Collar or Crown Grafts**. Price per 100 grafts of a sort, 60c.

Fig. 4.

Fig. 4. Grafts worked on what is termed **Whole Stock**, using No. 1 3-16 up caliper seedlings, and about 5 inch cion. Price per 100 grafts of a sort, 80 cents.

Fig. 6.

Fig. 6. Graft worked on No. 1, 3-16 up caliper stock, using all of such seedlings; usually making about 3 cuts of 3 inches each and with about 5 inch cion. Such grafts are termed **Piece Root Grafts**. Price per 100 of a sort 40 cents.

Fig. 11.

Fig. 11. Graft worked on No. 1, 3-16 caliper up stocks, using only second cut, and same to be about 5 inches, with 5 inch cion. Such grafts are termed **Second Cut Grafts**, and in our estimation the best grafts that can be secured from a seedling stock. Price per 100 grafts of a sort, 70 cents.

We also offer graded Piece Root Grafts, made into two grades, viz: Nos. 1 and 2. The small and otherwise inferior are placed in the No. 2 grade, leaving the No. 1 a very fine grade. Price No. 1, 35c. per 100, \$3.00 per 1000. Price No. 2, 30c. per 100, \$2.50 per 1000.

For Terms and Conditions Governing these Quotations see pages 6 and 7.

IN SUMMER.

Teas'
Weep-
ing
Russian
Mul-
berry.

IN WINTER.

This most remarkable tree will, undoubtedly, when known, take the foremost place among Weeping Trees, and all who see it appreciate at once that it is not only a FIRST-CLASS NOVELTY, but at the same time a tree of *sterling merit and value*.

It is the most GRACEFUL and hardy tree in existence, and wholly unlike anything heretofore introduced, forming a perfect umbrella shaped head, with long, slender, willowy branches drooping to the ground, parallel with the stem. All who have seen it agree that in light airy gracefulness and delicacy of form and motion it is without a rival.

It has BEAUTIFUL FOLIAGE—rather small—handsomely cut or divided into lobes, and of a delightful, fresh-looking, glossy green. In autumn many of the leaves are bordered with yellow, producing a novel and pleasing effect.

It is a long lived tree, flourishing in almost any soil or situation, wet or dry, and will be found particularly valuable in the Western and Southern states, where the Kilmarnock and other popular weeping trees utterly fail.

Rapid in growth and abundant in foliage, each branch adds to the formation of a finely rounded symmetrical head, making the MOST MAGNIFICENT tree ever introduced. It is especially desirable for ornamenting small grounds where trees of large size could not be used; and it is no less appropriate in parks and other extensive places.

It is admirably adapted to CEMETERY PLANTING. Indeed, here is a field where it stands without a rival, filling a long felt want. A perfect gem in size, style, and exquisite form together with all the hardiness, vigor and endurance that can be found in a tree. Cemetery trees are nearly always neglected and usually fail; but here is one peerless in beauty and suitableness, that will prove equal to the situation. It may be trained into a complete shady Arbor or a fine Ornamental Gateway, and a great variety of fanciful forms.

Twigs of this new weeper are not easily broken when packed for shipment—an item of great importance. It has another important feature: being very tenacious, it resists more hardships in the growing season than many other weepers that are grafted or budded standard height.

CAUTION—Our observation in the past years has proven conclusively that this tree must be grafted on upright growing stocks to give it support. If you want a tree as represented in the cut, see that graft or bud has been set in the height of the tree desired. If not, you may find you have a vine that must be furnished with a stake as support, and not a tree with its own support.

FOR PRICES OF WEEPING TREES, worked at various heights, see page 20.

OUR COOL STORAGE BUILDING.

A frost-proof brick block 60x120 feet.—Storage capacity for over 20 car-loads of trees, etc., for Winter and Spring shipments. In order to keep pace with our rapidly increased trade, we have erected this building, and claim for it the best adapted storage and packing house in the west for handling of Nursery Stock for wintered and Spring shipments.

At the Tenth Annual Nurserymen's Convention in Chicago on June 17 to 20th, and at Washington, D. C., June 16th to 20th, 1886, we represented Peach and Apple, Peach in dormant bud and Forest Tree Seedlings that had been placed in storage during December and were in fine condition for planting, and so pronounced by all the nurserymen who saw them there.
